Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5,7-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gabriel in view of Aoki et al. (US Patent No. 4,399,731)

Regarding Claims 3,4,13,14,26,27, Gabriel (See especially Figs. 1-3, Col. 7 lines 6-20, Col. 8 lines 37-44, Col. 12) discloses all features claimed but does not explicitly disclose the automatic composition feature, the display features, the microphone and compression features, or the radio features claimed.

Aoki et al. discloses an apparatus for automatically composing a musical piece (See Abstract). It would have been obvious to one of ordinary skill in the art to adapt the Gabriel teachings with those of Aoki, as both inventions are narrowly directed towards the art of musical devices that enable a user to easily and simply compose musical pieces.

With regard to the display, microphone, and compression features, it is noted that these recited features would have been notoriously old and well-known in the art of computer audio and computer audio software. It would have been obvious to one of ordinary skill in the art to adapt the Gabriel/Aoki combination with these teachings, so as to be able to expand the number of audio sources available to the user of the Gabriel/Aoki device.

Art Unit: 2837

Applicant argues that the combination above does not teach processing of voice/sound samples; however, Gabriel teaches audio data which is well known in the art to be considered sound or voice samples (Col. 8, lines 37-44). Applicant's arguments regarding concurrent composition and playback are not required in the claims as presented.

In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, in the knowledge generally available to one of ordinary skill in the art of electronic musical instruments, both Gabriel and Aoki are directed towards computer-implemented musical composition inventions, and it is well-known in the art to combine similar programs with similar features when implemented on a personal computer.
